COMPUTATIONAL SOCIOLOGY
Rutgers University

Syllabus

Thomas Davidson

Spring 2024

CONTACT AND LOGISTICS

E-mail: thomas.davidson@rutgers.edu

Website: <https://github.com/t-davidson/computational-sociology>

Class meetings: Thursday 2:00-4:40 pm, Davison 129 (Douglass Campus)

Office hours: Monday 4:00-5:00 pm, Davison 109, or by appointment.

COURSE DESCRIPTION

This course is designed to introduce students to computational methods and their applications to sociological research. We will discuss the computational toolkit from the bottom up, beginning with the fundamentals of programming and data analysis and management. To motivate the sociological applications of these techniques, we will explore social network analysis and agent-based modeling, two of the earliest areas of computational innovation in the discipline. Once these fundamentals are in place, we will consider different methods for collecting data from online sources including application programming interfaces, web-scraping, and online experiments. The remainder of the course will focus on computational methods for analyzing texts and images. First, we will cover various methods for the quantitative analysis of text data including word embeddings, topic modeling, and supervised learning. Second, we will discuss machine learning in more depth, assessing the relationship between prediction and explanation in social science, discussing bias and other limitations of these methods, as well as the opportunities these techniques present to work with images and multimodal data. Throughout the course students will gain hands-on experience with these different techniques and an understanding of how these techniques are being used in cutting-edge sociological research. Overall this course will provide students with a strong conceptual foundation in computational sociology and the ability to apply various techniques for data collection and analysis in their own research. All assignments will be conducted using the R programming language.

PREREQUISITES AND PREPARATION

This course is designed for students without any experience using computational methods or advanced statistics. Nonetheless, the course will proceed more efficiently if students without any such experience are willing to undertake some independent learning prior to the beginning of the course. In particular, I recommend students familiarize themselves with the R programming language, the RStudio computing environment, and RMarkdown documents, as we will be using these tools throughout the course. We will review these topics over the first few weeks of class, but the more familiar students are with these tools, the more time we can spend focusing on their sociological applications. Information on learning resources is provided on the course website.

ASSESSMENT

There will be two types of assessment used in the course. There will be four homework assignments (each worth 10% of the final grade) designed to help students to become familiar with the various methodological techniques covered in the course. A schedule of these assignments can be found in the course outline below. Students will also write an empirical paper over the course of the semester, worth 60% of the final grade. The paper will involve the collection of original data and preliminary analyses using one or more of the approaches covered in the course. I intend for the paper to be an opportunity for students to develop the basis for a qualifying exam, master's thesis, or dissertation chapter. Students are expected to make progress on the paper over the course of the semester. There will be three preliminary submissions related to the final paper (each worth 5% of the final grade): a proposal, initial data collection and descriptive analysis, and the implementation of methodological approach (see course outline for a timeline). Each of these stages will be an opportunity to gain feedback on the final paper. The final paper will be due at the end of the semester.

CHAT-GPT AND AI TOOLS

Over the course of the semester we will consider how generative artificial intelligence tools can be used to advance computational research and will situate these tools in the context of earlier techniques. Not only can these technologies contribute to methodological advances, but they are a valuable pedagogical resource. I encourage you to draw on these tools to help you to learn to code and learn various computational methods. At the same time, however, these tools come with risks. For example, they can produce misleading or incorrect results, and hence must be used with caution. I strongly recommend trying to solve problems yourself or by consulting the course materials before resorting to AI assistant.

AI tools can also be used in ways that violate academic integrity policies and undermine your learning. As such, you are prohibited for using ChatGPT or other AI tools to complete homework assignments or to write your final paper. Of course, the definition of AI tools becomes somewhat blurred when we think about tools like Grammarly, which uses similar technologies to help you improve your writing; Google Docs now has similar functionality and Microsoft is rolling this out in Office. I will permit you to use these tools to help you edit your work, but you may not use them to generate sentences or paragraphs of text. Similarly, I will permit you to use these tools to help edit and debug code in your final project, but you may not use them to generate entire chunks of code. *You will be asked to provide a statement in assignments and your final project detailing any ways that AI tools were used.* Please contact me if you are unsure about whether a particular use case is acceptable.

READINGS

There are weekly reading assignments for this course. These readings include methodological texts, reviews articles, and examples of how sociologists and other social scientists apply computational approaches in

their research.

Require texts

Available for free online at website provided.

RESOURCES

The course website contains all slides and resources used in class and is hosted on Github. Students will also use Github to submit assignments. We will be using Slack to communicate with one another during this course, all enrolled students will receive an invite to join the Slack channel. Please send me any email correspondence such as letters of accomodation or notifications of absence using your Rutgers account.

COURSE POLICIES

The Rutgers Sociology Department strives to create an environment that supports and affirms diversity in all manifestations, including race, ethnicity, gender, sexual orientation, religion, age, social class, disability status, region/country of origin, and political orientation. This class will be a space for tolerance, respect, and mutual dialogue. Students must abide by the Code of Student Conduct at all times, including during lectures and in participation online.

All students must abide by the university's Academic Integrity Policy. Violations of academic integrity will result in disciplinary action.

In accordance with University policy, if you have a documented disability and require accommodations to obtain equal access in this course, please contact me during the first week of classes. Students with disabilities must be registered with the Office of Student Disability Services and must provide verification of their eligibility for such accommodations.

COURSE OUTLINE

Week 1, 1/18

Introduction to Computational Sociology

Readings

- R4DS: Preface, C2-6, 21
- *Bit by Bit*, C1
- Lazer, David, et al. 2009. "Life in the Network: The Coming Age of Computational Social Science." *Science* 323 (5915): 721–23. <https://doi.org/10.1126/science.1167742>.

- Golder, Scott A., and Michael W. Macy. 2014. "Digital Footprints: Opportunities and Challenges for Online Social Research." *Annual Review of Sociology* 40 (1): 129–52. <https://doi.org/10.1146/annurev-soc-071913-043145>.
- Edelmann, Achim, Tom Wolff, Danielle Montagne, and Christopher A. Bail. 2020. "Computational Social Science and Sociology." *Annual Review of Sociology* 46 (1): annurev-soc-121919-054621. <https://doi.org/10.1146/annurev-soc-121919-054621>.

Further reading

- Bail, Christopher A. 2014. "The Cultural Environment: Measuring Culture with Big Data." *Theory and Society* 43 (3–4): 465–82. <https://doi.org/10.1007/s11186-014-9216-5>.
- Golder, Scott A., and Michael W. Macy. 2011. "Diurnal and Seasonal Mood Vary with Work, Sleep, and Daylength Across Diverse Cultures." *Science* 333(6051):1878–81. 10.1126/science.1202775.

Week 2, 1/25

Data Structures & Networks

Readings

- R4DS: C7-10, 16
- Bearman, Peter S., James Moody, and Katherine Stovel. 2004. "Chains of Affection: The Structure of Adolescent Romantic and Sexual Networks." *American Journal of Sociology* 110(1):44–91. 10.1086/386272.
- Kossinets, Gueorgi, and Duncan J. Watts. 2009. "Origins of Homophily in an Evolving Social Network." *American Journal of Sociology* 115(2):405–50.
- Shi, Feng, Yongren Shi, Fedor A. Dokshin, James A. Evans, and Michael W. Macy. 2017. "Millions of Online Book Co-Purchases Reveal Partisan Differences in the Consumption of Science." *Nature Human Behaviour* 1(4):0079. <https://doi.org/10.1038/s41562-017-0079>.

Further reading

- Granovetter, Mark. 1973. "The Strength of Weak Ties." *American Journal of Sociology* 78(6):1360–80.
- Breiger, Ronald L. 1974. "The Duality of Persons and Groups." *Social Forces* 53(2):181–90.
- Burt, Ronald S. 2004. "Structural Holes and Good Ideas." *American Journal of Sociology* 110(2):349–99.
- McPherson, Miller, Lynn Smith-Lovin, and James M. Cook. 2001. "Birds of a Feather: Homophily in Social Networks." *Annual Review of Sociology* 415–44.
- Block, Per, Christoph Stadtfeld, and Tom Snijders. 2019. "Forms of Dependence: Comparing SAOMs and ERGMs From Basic Principles." *Sociological Methods & Research* 48 (1): 202–39. <https://doi.org/10.1177/0049124116672680>.

Week 3, 2/1

Programming Fundamentals & Agent-based Modeling

Readings

- R4DS: C14-15, 17
- Macy, Michael, and Robert Willer. 2002. "From Factors to Factors: Computational Sociology and Agent-Based Modeling." *Annual Review of Sociology* 28 (1): 143–66. <https://doi.org/10.1146/annurev.soc.28.110601.141117>.
- Bruch, Elizabeth, and Jon Atwell. 2015. "Agent-Based Models in Empirical Social Research." *Sociological Methods & Research* 44 (2): 186–221. <https://doi.org/10.1177/0049124113506405>.
- Centola, Damon, and Michael Macy. 2007. "Complex Contagions and the Weakness of Long Ties." *American Journal of Sociology* 113(3):702–34. 10.1086/521848.

- Goldberg, Amir, and Sarah K. Stein. 2018. "Beyond Social Contagion: Associative Diffusion and the Emergence of Cultural Variation." *American Sociological Review* 83 (5): 897–932. <https://doi.org/10.31235/osf.io/uqvvd3>.

Further reading

- Watts, Duncan. 1999. "Networks, Dynamics, and the Small-World Phenomenon." *American Journal of Sociology* 105 (2): 493–527. <https://doi.org/10.1086/210318>.
- Centola, Damon. 2015. "The Social Origins of Networks and Diffusion." *American Journal of Sociology* 120 (5): 1295–1338. <https://doi.org/10.1086/681275>.
- DellaPosta, Daniel, Yongren Shi, and Michael Macy. 2015. "Why Do Liberals Drink Lattes?" *American Journal of Sociology* 120 (5): 1473–1511. <https://doi.org/10.1086/681254>.

Assignment 1 released: Applying the computational toolkit. Due 2/9 at 5pm.

Week 4, 2/8

Collecting Data Using Application Programming Interfaces

Readings

- R4DS: C11 ("Strings with stringr"), 13 ("Dates and Times with lubridate")
- *Bit by Bit*, C2
- Askin, Noah, and Michael Mauskopf. 2017. "What Makes Popular Culture Popular? Product Features and Optimal Differentiation in Music." *American Sociological Review* 82 (5): 910–44. <https://doi.org/10.1177/0003122417728662>.
- Freelon, Deen. 2018. "Computational Research in the Post-API Age." *Political Communication* 35 (4): 665–68. <https://doi.org/10.1080/10584609.2018.1477506>.

Week 5, 2/15

Collecting Data Using Webscraping

Readings

- *Bit by Bit*, C6
- Li, Fumin, Yisu Zhou, and Tianji Cai. 2021. "Trails of Data: Three Cases for Collecting Web Information for Social Science Research." *Social Science Computer Review* 39(5):922–42. 10.1177/0894439319886019.
- Tjaden, Jasper. 2023. "Web Scraping for Migration, Mobility, and Migrant Integration Studies: Introduction, Application, and Potential Use Cases." *International Migration Review*. 10.1177/01979183231208428.
- Fiesler, Casey, Nate Beard, and Brian C Keegan. 2020. "No Robots, Spiders, or Scrapers: Legal and Ethical Regulation of Data Collection Methods in Social Media Terms of Service." In *Proceedings of the Fourteenth International AAAI Conference on Web and Social Media*, 187–96.
- Dahlke, Ross, Deepak Kumar, Zakir Durumeric, and Jeffrey T. Hancock. 2023. "Quantifying the Systematic Bias in the Accessibility and Inaccessibility of Web Scraping Content From URL-Logged Web-Browsing Digital Trace Data." *Social Science Computer Review*. 10.1177/08944393231218214.

Assignment 2: Collecting and storing data released. Due 2/23 at 5pm.

Week 6, 2/22

Online Experiments and Surveys

Readings

- *Bit by Bit*, C3-5

- Salganik, Matthew J., and Duncan J. Watts. 2008. "Leading the Herd Astray: An Experimental Study of Self-Fulfilling Prophecies in an Artificial Cultural Market." *Social Psychology Quarterly* 71 (4): 338–55. <https://doi.org/10.1177/019027250807100404>.

Assignment 4: Machine learning and text classification released. Due 4/12 at 5pm

Week 12, 4/11

(Large) Language Models

Readings

- Danescu-Niculescu-Mizil, Cristian, Robert West, Dan Jurafsky, Jure Leskovec, and Christopher Potts. 2013. "No Country for Old Members: User Lifecycle and Linguistic Change in Online Communities." In *Proceedings of the 22nd International Conference on World Wide Web*, 307–318. <http://dl.acm.org/citation.cfm?id=2488416>.
- Jensen, Jeffrey L., Daniel Karell, Cole Tanigawa-Lau, Nizar Habash, Mai Oudah, and Dhia Fairus Shofia Fani. 2022. "Language Models in Sociological Research: An Application to Classifying Large Administrative Data and Measuring Religiosity." *Sociological Methodology* 52(1):30–52. 10.1177/00811750211053370.
- Wankmüller, Sandra. 2022. "Introduction to Neural Transfer Learning With Transformers for Social Science Text Analysis." *Sociological Methods & Research*. 10.1177/00491241221134527.
- Bender, Emily M, Timnit Gebru, Angelina McMillan-Major, and Shmargaret Shmitchell. 2021. "On the Dangers of Stochastic Parrots: Can Language Models Be Too Big?" In *Conference on Fairness, Accountability, and Transparency (FAccT '21)*, 14. Canada: ACM Press.

Week 14, 4/25

Student presentations

- 10 minute presentation, plus Q&A
 - Five slides (Add to shared Google Slides presentation)
 - * Title
 - * Motivation
 - * Data
 - * Methodology
 - * Results

Final paper

Final paper due via email on 5/3 at 5pm
